

Reach Subsea Website — Design Reference

Prepared for the web design team · September 2026

This document walks through the proposed Reach Subsea website: a site map overview, followed by a page-by-page breakdown with design and content notes alongside a visual of each page.

Site map

Reach Subsea — site map

28 pages across seven sections. Global navigation: Company · Services · Investors · Careers · Newsroom, plus Contact and FAQ reached from the header/footer on every page.

Home

Landing page introducing the company — hero, key stats, service highlights, latest news, and a short FAQ preview.

Services

The full offering, organized by service line, plus the technology and fleet behind it.

Services — Overview

Hub page introducing the three service lines and linking to fleet, technology and Reach Remote.

Subsea Services

Inspection, maintenance and repair for offshore infrastructure.

Survey Services

Geophysical, geotechnical and positioning survey work.

Monitoring Services

Ongoing reservoir and environmental monitoring technologies.

Technology & Innovation

The R&D and monitoring technology behind the services, and research partnerships.

Research & Publications

Library of the company's conference papers and journal articles.

Assets & Fleet

The chartered and owned vessel fleet, ROVs and uncrewed surface vessels.

Reach Remote

Concept, technology and capabilities behind uncrewed vessel operations.

Reach Remote 3 & 4

Status update on the build of the next two Reach Remote vessels.

Explore 3D World

Landing page for the interactive 3D exploration tool.

Company

Who Reach Subsea is, how it operates, and how it's led.

About Us

Company overview, history and values.

Leadership & Board

Executive management and board of directors.

HSEQ

Health, safety, environment and quality approach and certifications.

Sustainability

Sustainability commitments and reporting.

Investors

Financials, governance and shareholder information.

Investors — Overview

Entry point to investor relations content.

Why Invest in Reach Subsea

The investment case, financial highlights and growth strategy.

Charter Agreement Overview

Timeline of vessel charter agreements and the owned Reach Remote fleet.

Reports, Presentations & Shareholder Information

Financial reports archive and shareholder data, 2012-present.

Governance & General Meetings

Corporate governance framework and Annual/Extraordinary General Meeting information.

Financial Calendar

Upcoming reporting dates.

Careers

Life at Reach Subsea, values, and opportunities.

Careers — Overview

Working at Reach Subsea and open positions.

Life at Reach

Day-to-day life working at Reach Subsea.

Our Culture

Company values and culture in practice.

Why Work With Us

Reasons to join, growth paths and benefits.

Newsroom

Press, brand assets, and media contact.

Press & Media

Announcements, brand kit and press contact.

Contact & FAQ

How to reach the company, and answers to common questions.

Contact

Global office locations and department contact emails.

FAQ

Categorized answers to frequently asked questions.

01 — Home

HOME

Purpose. The landing page and main entry point to the site.

Sections. Hero with headline and two CTAs; a live-zones map graphic; a stats strip (established, fleet, people, countries); a four-tile “Ocean operations, reimagined” feature grid; a “Latest from Reach” spotlight; a Newsroom preview grid; a LinkedIn feed row; a top-3 FAQ preview; a closing CTA band; footer.

Status. Company stats and fleet/vessel facts are real and current. The LinkedIn feed cards are illustrative placeholders, clearly labelled — wire this up to a real feed or remove before launch.

02 — Services — Overview

SERVICES

Purpose. Hub page for the Services section, introducing the two vessel delivery modes and linking out to every service line and supporting page.

Sections. Hero; “One partner, two ways to reach the seabed” (crewed vs. uncrewed vessels, both carrying ROV and survey capability); cards for the three service lines (Subsea, Survey, Monitoring); Technology & Innovation and Assets & Fleet callouts; a videos/animations and project-references section; FAQ; CTA; footer. Carries the dark Services subnav pill bar.

Status. Project-reference cards are real, sourced from the live projects page. Three video/animation cards are illustrative placeholders pending real media.

03 — Services — Subsea Services

SERVICES

Purpose. Service-line detail page for inspection, maintenance and repair (IMR) work.

Sections. Photo hero; capability breakdown; equipment/vessel imagery; a video & project-references section; FAQ (page-specific); CTA; footer.

Status. Hero and one video thumbnail use Olympic Taurus / Go Electra photography as stand-ins for Deep Cygnus, since no real Deep Cygnus photo exists yet — swap in when supplied. Most capability cards carry a placeholder “Video / spec sheet — add link” button pending real material.

04 — Services — Survey Services

SERVICES

Purpose. Service-line detail page for geophysical, geotechnical and positioning survey work.

Sections. Photo hero; capability breakdown; equipment imagery; a video & project-references section; FAQ (page-specific); CTA; footer.

Status. Project references are real. Capability cards mostly carry placeholder video/spec-sheet buttons pending real material.

05 — Services — Monitoring Services

SERVICES

Purpose. Service-line detail page merging geophysical reservoir monitoring (gWatch, DepthWatch, WellWatch, DrillWatch) and environmental monitoring into one page.

Sections. Photo hero; monitoring-product capability cards; an “Environmental monitoring” section (no third-party brand name attached); a video & project-references section; FAQ (page-specific); CTA; footer.

Status. gWatch's video card is confirmed real. Other capability cards carry placeholder video/spec-sheet buttons. Third-party names (iSurvey, Octio, MonViro) are deliberately absent from this page's own copy — see the note under “Governing conventions” at the end of this document.

06 — Services — Technology & Innovation

SERVICES

Purpose. Explains the real, active technology development programmes behind Reach Subsea's services — AI-enabled perception/autonomy, remote operations, data infrastructure and geophysical monitoring — plus the company's research partnerships (DigiMon, ASUMO).

Sections. Hero; an "AI-enabled perception, autonomy & remote operations" section leading the page (Reach Pilot, Reach Remote, Reach Horizon, Reach Relay — 4 cards, the page's main focus); a single compact "Established technology & research heritage" cross-link section (2 cards: geophysical monitoring technology → Monitoring Services, research partnerships DigiMon/ASUMO → Research & Publications) replacing what was previously two full detail sections; a technology-videos section; a callout into the Research & Publications library; FAQ (page-specific); CTA; footer.

Status. Reach Pilot, Reach Remote's AROS notation/UK-sector remote operation/fuel-savings figure, and Reach Relay are all real, sourced directly from the Reach Subsea ASA 2Q 2026 Report (pp.18-20) — this is genuinely the newest, most active development area per that report, not previously reflected on this page. Reach Horizon copy is sourced from investor earnings calls (real, on-the-record) rather than a dedicated product page — framed accordingly. Per Jorunn's feedback, monitoring technology is deliberately de-emphasized here as 'old news' — full detail now lives only on Monitoring Services, with this page cross-linking rather than duplicating it. The Reach Pilot and Reach Remote video cards are both illustrative pending real footage.

07 — Services — Research & Publications

SERVICES

Purpose. A library of the company's academic and industry output.

Sections. Hero; year-by-year publication counts, 2013–2026; a list/grid of 48 real conference papers and journal articles with authors and venues; FAQ (page-specific); CTA; footer. Secondary page — no active subnav pill.

Status. All 48 publications are real, sourced from the live Selection of Publications page.

08 — Services — Assets & Fleet

SERVICES

Purpose. The vessel and equipment fleet, split into what's active today versus what's incoming, plus the ROV and survey/monitoring equipment those vessels carry.

Sections. Hero; a top stat strip (Fleet in service: 11, Newbuilds joining: 4); “The chartered fleet, in service” (9 vessels); a separate “Newbuilds & vessels joining the fleet” section (Viking Vigor, Newbuild NB76) that cross-references Reach Remote 3 & 4 below; a “Reach Remote & DriX” section (anchor `#remote`) with Reach Remote 1 & 2 (in operation) and Reach Remote 3 & 4 (in build) plus DriX USV cards; a ROV Fleet section (headline stat + per-vessel category cards: WROV Constructor, Supporter WROV, Schilling HD WROV, Surveyor Interceptor, plus a ZEEROV note) sourced from the 2Q 2026 Report and reachsubsea.no; a Survey & Monitoring Assets section; a media & project-references section; FAQ (page-specific); CTA; footer.

Status. The 11-in-service / 4-newbuilds top-line figure spans the whole fleet: 9 chartered vessels + Reach Remote 1 & 2 in service; the 2 chartered newbuilds + Reach Remote 3 & 4 make up the 4 joining. Vessel specs are real and current. Deep Cygnus has no real photo yet (text-only card). Some vessel/ROV cards carry placeholder video/spec-sheet buttons. ROV Fleet headline figure (15 systems: 13 WROV + 2 Surveyor Interceptor) is real, cited to the 2Q 2026 Report. The per-vessel breakdown doesn't fully reconcile to the fleet-wide total yet — see the page's own reconciliation note.

09 — Services — Reach Remote

SERVICES

Purpose. Explains the concept, technology and capabilities behind Reach Subsea's uncrewed vessel operations — positioned as vessel + onshore Remote Operations Centre (ROC) + Reach Horizon software together, not just the vessels.

Sections. Hero; “more than a vessel” three-part model section; real vessel specs (length, speed, endurance, survey sensors, ROV); the four-level remote-oversight model; Kongsberg Maritime and Massterly partnership mentions; standalone-product/carve-out context (sourced from investor communications); link to the Reach Remote 3 & 4 build page; closing CTA (generic — no named individual); footer.

Status. Vessel specs and partnerships are real, sourced from reachsubsea.no. The standalone-product/carve-out framing is sourced from earnings-call transcripts, not yet a dedicated product page — flagged as such.

10 — Services — Reach Remote 3 & 4 (Build & EU Funding Report)

SERVICES

Purpose. A secondary status page on the build of the next two Reach Remote vessels and their EU funding.

Sections. Hero; build-status timeline; EU-funding context; CTA; footer.
Secondary page — no active subnav pill, no FAQ section (page is narrow enough in scope that a dedicated FAQ mostly restated the same facts).

Status. No confirmed delivery date exists yet for Reach Remote 3 & 4 — shown as an in-build/open-ended state. Page is tagged Draft: it needs a full build-progress walkthrough with the operations team before this goes live.

11 — Services — Explore 3D World

SERVICES

Purpose. Landing page introducing the real interactive 3D exploration tool hosted at world.reachsubsea.com.

Sections. Hero; four operation-themed zone cards (framed around the operation/vessel combination, not the backdrop asset); embed/launch callout; FAQ (page-specific); CTA; footer.

Status. Page is tagged Draft: zone names and descriptions are a first-pass and need refinement before this goes live.

12 — Company — About Us

COMPANY

Purpose. Company overview — history, values and what Reach Subsea does.

Sections. Hero; “Our story” narrative framed around operational experience and technology, not an engineering-specific pitch; “Learn. Teach. Reach.” values pillars with the “Within Reach” tagline; a stat strip (Established, Offices, Employees); FAQ (page-specific); CTA; footer. Carries the light Company subnav pill bar (About / Leadership / HSEQ / Sustainability).

Status. Content is real company narrative and current stats. Deliberately positioned as a global operator built on operational experience rather than a Norwegian-engineering-first story; there is no standalone HQ/location stat on this page — Haugesund is mentioned on the Leadership page instead.

ABOUT REACH SUBSEA

Sustainable access to ocean space

Established in 2008, we are a company with a comprehensive knowledge of subsea operations — known and respected for world-class engineering and state-of-the-art remotely-operated underwater vehicles (ROV).

OUR STORY

Deep operational experience, moving technology forward

We have built our reputation on deep operational experience across the oil & gas and renewables industries — flexible, highly competitive delivery, backed by people who know these environments inside out.

Today that same operational experience carries our fleet of survey, ROV and remote-operated vessels across subsea, survey & production, geophysical monitoring and environmental monitoring — worldwide, and increasingly through technology we have developed ourselves, like Reach Helios and Reach Horizon.

ESTABLISHED:

2008

OFFICES:

8, in 4 countries

PEOPLE:

500+

Deep operational experience, in-house ROV expertise, and a fleet built for the work.

OUR VISION

“Sustainable access to ocean space”

This vision underpins our commitment to take part in the creation of a sustainable future — for our clients, our people and the ocean we work in.

OUR VALUES

Learn. Teach. Reach. Within Reach.

01 — LEARN

Learn

We are in constant search for new and relevant insight, making it safe and difficult to keep up with. We question and challenge established ways of performance, acquiring and developing technology to constantly improve data acquisition, analysis and operations.

02 — TEACH

Teach

We share our knowledge to grow as a team and to improve industry standards, continuously striving to find solutions beyond current paradigms. We share knowledge in-house and ensure it is successful in alignment with our clients.

03 — REACH

Reach

We have ambitions, and we believe everything is within reach. By investing in R&D and strong technological and methodological traps, we reach for new heights — because no matter how good we get, there is always something better ahead.

Meet the people leading Reach Subsea

Our management team and Board of Directors bring together deep offshore, engineering and capital markets experience.

Meet our leadership →

FAQ

Frequently asked questions

Answers about who we are and where we work.

See all FAQs →

When was Reach Subsea established?

2008, headquartered in Haugesund, Norway.

Where does Reach Subsea have offices?

Haugesund (HQ), Bergen, Sandness, Harstad, Båtsfjord, West Perth, Singapore and Aberdeen, with further presence in Sweden, Brazil and Cyprus — 8 offices across 4 countries, reaching clients in 9 countries in 2024.

How many people work at Reach Subsea?

500+ people across our operations.

REACH
SUBSEA

Transforming the way we work in the ocean.

Reach Subsea Website — Design Reference · 14 of 31

13 — Company — Leadership & Board

COMPANY

Purpose. Introduces the executive management team and board of directors by name.

Sections. Hero; executive team grid with photos, titles and contact rows; board of directors grid; FAQ (page-specific); CTA; footer.

Status. Names, titles and (where shown) contact details are real — this is the one page where naming individuals is the point, unlike the general Contact page. This is also the one page that names Haugesund as the headquarters; the rest of the site is written to read as a global company and avoids repeating it.

14 — Company — HSEQ

COMPANY

Purpose. Health, safety, environment and quality approach and certifications.

Sections. Hero; safety philosophy; certification badges; safety-culture imagery; a “Related” row (Transparency Act, Life Saving Rules, latest HSEQ campaign) — each item is a direct file download, not a link to a landing page; FAQ (page-specific); CTA; footer.

Status. Certifications and safety copy are real. The three related-documents items link straight to a PDF/file each; there is no dedicated landing page for any of them, and the HSEQ-campaign item should always point at whichever campaign is current, replacing the file as campaigns change.

15 — Company — Sustainability

COMPANY

Purpose. Sustainability commitments and reporting.

Sections. Hero; key-figures stat bar; ESG pillars, each now led by an explicit priority claim rather than a general activity summary — Environmental: technology choices are the biggest lever, Reach Remote named as the single biggest of them, monitoring tech (gWatch) second, GHG/vessel/oils facts supporting; Social: health & safety named as the first priority given offshore risk, workforce/diversity figures supporting; Governance: a new cyber security subsection (technology-company framing — Reach Remote's remote systems and client data — working toward ISO 27001) leads, with anti-corruption/modern slavery/board diversity/Transparency Act following; ISO certifications grid; UN SDGs; reporting-history CTA; FAQ (page-specific); footer.

Status. Content is real; note a one-off “529 employees” figure here sits alongside the site's usual “500+” rounding — left as-is, both are roughly consistent. ISO 27001 is explicitly framed as in-progress (“working toward”), not added to the ISO certifications grid, since Reach is not yet certified — don't promote it to that grid until certification is confirmed.

16 — Investors — Overview

INVESTORS

Purpose. Entry point to the Investors section.

Sections. Hero; key financial highlights (Q2 2026) with a stat strip (Established, Employees, Offices, Countries reached); links into Why Invest, Charter Overview, Reports Archive, Governance and Financial Calendar; closing CTA (generic — “Would you like to know more?”); footer. Carries the dark Investors subnav pill bar (7 pills: Overview / Why invest / Reports & presentations / Share info / Governance / Financial calendar / Contact).

Status. Financial figures are real, verified against the 2Q 2026 report. “Offices” (8) and “Countries reached” (9) are two different counts — offices is physical locations, countries reached is the broader footprint including where the company operates without an office — keep them as separate, clearly labelled stats rather than collapsing into one number.

17 — Investors — Why Invest in Reach Subsea

INVESTORS

Purpose. The in-depth investment case — results, thesis and strategy.

Sections. Hero; real Q2 2026 results (revenue, EBIT, backlog, tender pipeline); four investment-thesis pillars; growth strategy; market opportunity; proof points; FAQ (page-specific); CTA; footer.

Status. Financials are real and verified. The share-price chart is illustrative sample data — swap in the live chart before publishing.

18 — Investors — Charter Agreement Overview

INVESTORS

Purpose. A Gantt-style timeline of vessel charter agreements alongside the owned Reach Remote fleet.

Sections. Hero; charter-agreement Gantt chart (firm periods vs. options, 2025–2029), now with a distinct Project charter category — its own bar style, legend entry and category-label divider — separating Normand Jarstein from the long-term firm+option chartered vessels above it; a second, visually distinct section for the owned/operated Reach Remote 1–4 fleet; CTA; footer. Secondary page — no active subnav pill, no FAQ section (the chart mostly speaks for itself; a dedicated FAQ largely restated it).

Status. Charter data is real and current, sourced from the 2Q 2026 fleet table and presentation. Normand Jarstein is categorized as Project charter per Jorunn's direct correction (Sept 2026) — matches how the 2Q 2026 presentation itself categorizes it, distinct from the long-term chartered vessels. No confirmed delivery date yet for Reach Remote 3 & 4, shown as an open-ended bar.

19 — Investors — Reports, Presentations & Shareholder Information

INVESTORS

Purpose. The full financial-reports archive and shareholder reference data.

Sections. Hero; a source-accuracy banner; a quarterly reports & presentations archive, 2012–present, presented as a collapsible accordion by year (each year expands/collapses independently; the current year is open by default) — flag this interaction to your front-end team, it's a simple native disclosure widget, not a custom script; an annual-reports chip list; bond/credit/prospectus documents; a largest-shareholders table; a link out to Oslo Børs Newsweb; FAQ (page-specific); CTA; footer.

Status. All quarters, annual reports and documents are real, mirroring the live archive. A handful of pre-2023 publication dates are blank pending confirmation. The shareholder table is a real but dated snapshot — refresh from the live Oslo Market Solutions / Euronext Securities feed before publishing.

The screenshot displays the 'Reports, presentations, webcasts & shareholder information' page on the Reach Subsea website. The page features a dark blue header with navigation links: Overview, Why Invest, Reports & presentations (active), Governance, Financial calendar, and Contact us. A large hero image shows a blue offshore vessel. Below the hero, a section titled 'Reports, presentations, webcasts & shareholder information' states: 'A single archive of everything Reach Subsea publishes to the market — quarterly and annual reports, presentations and webcast recordings back to 2012, plus reference data such as the largest shareholders list from Oslo Børs.' A warning banner indicates that while the archive is comprehensive, it may not be 100% accurate for the latest data. The 'FINANCIAL REPORTS' section includes a 'Quarterly reports & presentations' accordion, currently showing Q2 2026 (published 12 August 2026, Investor NOK 586, Inc. 2021 NOK 352,4M) with links for Report, Presentation, and Webcast. Below this is a list of other quarters from 2025 to 2012. The 'ANNUAL & SUSTAINABILITY REPORTS' section features 'Annual reports, every year since 2012' with a list of reports from 2026-PFP to 2012-PFP. The 'OTHER DOCUMENTS' section includes 'Bond, credit & transaction documents' with links for Bond prospectus, Credit investor presentation, Survey acquisition presentation, and Other prospectuses. The 'LARGEST SHAREHOLDERS' section lists the top 10 largest shareholders as of 30 June 2026, including Wulf, Wilhelmsen Holding ASA (29.59%), North Energy ASA (15.53%), Nordre Investment Management AS (Norway) (13.50%), and others. The 'ANNOUNCEMENTS' section includes 'Stock exchange announcements & filings'. A 'FAQ' section titled 'Frequently asked questions' addresses common queries about the archive. The footer contains a 'Looking for something specific?' section with a link to 'Investor relations contact' and a detailed navigation menu.

Reports, presentations, webcasts & shareholder information

A single archive of everything Reach Subsea publishes to the market — quarterly and annual reports, presentations and webcast recordings back to 2012, plus reference data such as the largest shareholders list from Oslo Børs.

FINANCIAL REPORTS

Quarterly reports & presentations

The complete archive, 2012 to present — every entry below is a real quarter from reachsubsea.no/financial-reports. Stock publication dates are shown when we have published them from the Oslo Børs website.

Year	Quarter	Published	Investor NOK	Inc. 2021 NOK	Report	Presentation	Webcast
2026	2 quarters						
Q2 2026		Published 12 August 2026	Investor NOK 586, Inc. 2021 NOK 352,4M				
Q1 2026		Published 29 April 2026					
2025	4 quarters						
2024	4 quarters						
2023	4 quarters						
2022-2021	16 years						
2012	4 quarters						

ANNUAL & SUSTAINABILITY REPORTS

Annual reports, every year since 2012

2026-PFP • 2025-PFP • 2024-PFP • 2023-PFP • 2022-PFP • 2021-PFP • 2020-PFP • 2019-PFP • 2018-PFP • 2017-PFP • 2016-PFP • 2015-PFP • 2014-PFP • 2013-PFP • 2012-PFP

Every year from 2012 to 2026 has a downloadable Annual Report on the Oslo Børs 2012-2026 also ship as PDF (downloadable version). Sustainability Reports were published separately for 2019-2022, from 2023 onwards sustainability reporting is integrated into the Annual Report (last 3 years) carry the 'Sustainable Report' title.

OTHER DOCUMENTS

Bond, credit & transaction documents

Bond prospectus
None announced before 2026

Credit investor presentation
None

Survey acquisition presentation
None

Other prospectuses
None shown 2012-2026

LARGEST SHAREHOLDERS

The 10 largest shareholders, sourced via Oslo Market Solutions with data from Euronext Securities — the latest reporting they made on the Oslo Børs.

Shareholder	Shares	Ownership %
Wulf, Wilhelmsen Holding ASA	95,044,000	29.59%
North Energy ASA	30,802,400	15.53%
Nordre Investment Management AS (Norway)	44,200,247	13.50%
Indre Holding AS	6,421,000	1.94%
Ji Invest AS	6,038,326	1.89%

These lists are consolidated across multiple sources on Reach Subsea's largest holders, but this is a live register that mixes with trading activity — confirm the current list of top and all on of data against Oslo Børs website. Euronext Securities feeds the data into the Oslo Børs website, but this is a live register that mixes with trading activity — confirm the current list of top and all on of data against Oslo Børs website.

ANNOUNCEMENTS

Stock exchange announcements & filings

Real-time company announcements as filed to Oslo Børs Newsweb — the live site feeds straight into the Oslo Market Solutions disclosure platform rather than feeding these directly.

FAQ

Frequently asked questions

Answers about our reports, presentations and shareholder information.

When can I find Reach Subsea's past annual reports?
You will find every Annual Report from 2012 to 2026, plus every quarterly report, presentation and webcast back to 2012.

How far back does the reports archive go?
To 2012 — Reach Subsea's first-ever quarterly report Q2 2012 through to the current quarter.

When can I find information on Reach Subsea's largest shareholders?
See the Largest Shareholders table on this page, sourced from Oslo Market Solutions with data from Euronext Securities.

Looking for something specific?

20 — Investors — Governance & General Meetings

INVESTORS

Purpose. Corporate governance framework and Annual/Extraordinary General Meeting information, combined on one page.

Sections. Hero; governance framework (Board of Directors, Audit Committee, Remuneration Committee); AGM and EGM explainer; governance documents (Articles of Association, Code of Conduct); a notices & minutes archive section; FAQ (page-specific, covering both governance and meetings); CTA; footer.

Status. The committee structure shown is illustrative — confirm current composition before publishing. The notices & minutes archive is empty, awaiting real meeting records.

21 — Investors — Financial Calendar

INVESTORS

Purpose. Upcoming investor-reporting dates.

Sections. Hero; a short list of upcoming dates (next quarterly report, annual report, AGM); CTA; footer. No FAQ section (the page is a short date list; a dedicated FAQ mostly restated it).

Status. Only the Q3 2026 Interim Report date (17 Nov 2026) is confirmed; the remaining dates are estimated and labelled as such.

22 — Careers — Overview

CAREERS

Purpose. Hub page for working at Reach Subsea and open positions.

Sections. Hero; culture/values highlights; open-positions callout linking to the external Candidate Portal; FAQ (page-specific); CTA; footer. Carries a light Careers subnav pill bar (Overview / Life at Reach / Our Culture / Why work with us).

Status. Content is real; the Candidate Portal itself is an external system, not a page in this design.

23 — Careers — Life at Reach

CAREERS

Purpose. Day-to-day life working at Reach Subsea.

Sections. Photo hero; day-in-the-life photo spread; employee-quote cards; company stats (people, countries, trainee programme); FAQ (page-specific); CTA; footer.

Status. Employee quotes are illustrative placeholders — real quotes (with names, roles and permission to use them) are needed before publishing.

24 — Careers — Our Culture

CAREERS

Purpose. Company values and culture, in practice.

Sections. Hero; the “Learn. Teach. Reach.” pillars, each extended with a concrete “in practice” example; “Our people” and “Safety & quality” sections; a Human and Organisational Performance (HOP) section (the standard five principles: error is normal, blame fixes nothing, context drives behaviour, learning is vital, response matters); FAQ (page-specific); CTA; footer.

Status. Content is real, drawn from the company's own values language used elsewhere on the site. The HOP section reflects a safety approach used industry-wide, not a Reach-specific programme — copy should be reviewed against the company's actual HOP materials if/when those exist.

25 — Careers — Why Work With Us

CAREERS

Purpose. Reasons to join, growth paths and benefits.

Sections. Photo hero with an overlapping “reasons to join” card strip; a benefits grid; FAQ (page-specific); CTA; footer.

Status. The benefits grid is illustrative — confirm the real, current benefits package before publishing. The "Work at the edge of the industry" reasons-to-join card and its matching FAQ answer now name Reach Pilot and Reach Remote specifically, cross-referencing Technology & Innovation, so prospective hires see that Reach Subsea builds its own AI-enabled and autonomous-operations technology rather than only monitoring products.

26 — Newsroom — Press & Media

NEWSROOM

Purpose. Press announcements, brand assets and media contact.

Sections. Hero; announcements list; brand-asset/colour-swatch section; a press-materials section (downloadable photo and video categories); a media-contact card (department email, no named individual); FAQ (page-specific); CTA; footer.

Status. Announcements are real news items. The press-materials cards are illustrative placeholders — each category's download only appears once the actual files are uploaded; a category with nothing uploaded shows no card or button rather than a dead link (see “Governing conventions”).

27 — Contact

CONTACT & FAQ

Purpose. How to reach the company — offices and departments.

Sections. Hero; a global-offices grid (8 offices across 4 countries, each with its own real address/phone where applicable); a “Key contacts by topic” grid of six department email addresses (investor relations, press & media, careers & recruitment, sales, invoices, HSEQ) — general mailboxes, not named individuals; FAQ (page-specific); footer.

Status. Office addresses and phone numbers are real. There is deliberately no single company-wide phone number or email positioned as a default — visitors are routed to the office nearest them or the topic-specific address.

28 — FAQ

CONTACT & FAQ

Purpose. The categorized FAQ landing page reached from the “See all FAQs” button present on every other page.

Sections. Intro; five category groups (Services, Company, Investors, Careers, General) with jump-link chips; four questions per category; a closing “Still have a question?” CTA; footer.

Status. All FAQ copy sitewide (this page and the per-page top-3 blocks) is newly drafted and grounded in facts established elsewhere on the site, but has not yet been reviewed and approved — treat as draft pending confirmation.

Governing conventions

A few conventions apply consistently across the site and are worth knowing before implementing:

- Vessels are delivered in exactly two modes throughout the copy: crewed and uncrewed. Never described as three.
- General contact points (Contact, Press & Media, FAQ) use department email addresses only — never a named individual or personal phone number. The one deliberate exception is the Leadership & Board page, where naming individuals is the point.
- Third-party monitoring technology names (iSurvey, Octio, MonViro) appear only in historic archive material, never in the company's own explanatory copy about its monitoring services.
- Content-status labels used throughout this document: **Illustrative** (placeholder standing in for real material), **Draft** (real in substance, not yet reviewed/approved), **Needs input** (awaiting information from the company), **Estimated** (a date or figure not yet confirmed).
- Attachment, spec-sheet, video and download links (vessel/ROV cards, HSEQ related documents, press materials, etc.) are conditional: the link or button should render only when a real file is uploaded for it. Where no file exists yet, omit the link/button entirely rather than pointing it at a placeholder # href — a category or card with nothing uploaded shows no control at all.
- Frequently-updated brand and positioning content — Vision, Mission, Values statements and similar — should be built as CMS-editable content blocks rather than hardcoded in the page template, so marketing can update the wording without a development request.

Interaction & linking conventions

These patterns repeat across many pages and are described once here rather than per page. Every card, button and link in the per-page specs is one of these:

- **Landing-page link** — the card/button navigates to a dedicated page (e.g. a service card on the Services hub, a subnav pill, a footer link).
- **Flip / reveal card** — the card turns over (or expands) in place on click/tap to show a few additional sentences, with no navigation and no dedicated page. Used where a topic doesn't warrant its own URL.
- **Direct file link** — the control opens or downloads a file directly (PDF, image, video) with no landing page in between, subject to the conditional-rendering rule above.
- **Anchor jump** — the control scrolls to a section further down the same page (e.g. FAQ category chips, in-page cross-references between fleet sections) rather than navigating anywhere.
- **Standard footer/FAQ patterns** — a "See all FAQs" button always goes to the FAQ page; a generic "Contact us" CTA always goes to the Contact page; these are not called out individually on every page spec.

Each page's own spec calls out which of these applies wherever it isn't obvious from context.
