Q1 HSEQ CAMPAIGN

NAVIGATE SAFELY

Smooth onboarding process

All new colleagues at Reach Subsea encounter numerous aspects to familiarise themselves with during their initial days. It is imperative that we collaborate to ensure a smooth onboarding process, fostering a strong HSE (Health, Safety, and Environment) culture. Let's rely on our core values as a compass to maintain a safe work environment every day.

LEARN

As a new member of the Reach Subsea team, listen to your more experienced colleagues. Ask questions, rather one too many than one too few. Even for individuals with experience in other maritime companies, each company has its unique nuances and distinctive characteristics.

TEACH

As a seasoned member of the team, seize every chance to guide your new colleague on navigating and integrating themselves within the company. Be patient and remember that even things you take for granted might be news to others.

REACH

Ensuring safe operations and achieving excellent HSE performance is our objective. By collaborating to minimize risks, alerting one another to hazards, and maintaining a secure and organized environment, we can collectively attain this goal.
