

QUALITY CONTROL FOCUS

MEET THE EXPECTATIONS – DELIVER QUALITY IN EVERY STEP

During times of change it is important to ensure that the quality of our services is maintained and that we deliver quality in everything we do.

All personnel are encouraged to report and act on any non-conformities related to quality aspects. This ensures that any deviations are captured at an early stage and rectified – use the MINCS system to report any non-conformities or deviations.

To maintain satisfied clients, we need to focus on the right activities taking ownership in our work and deliver quality in each step.

We can do this by learning from our mistakes. This makes it easier to catch trends and errors before they result in unwanted outcomes affecting the client, our products or platforms.

ACTIONS TO ENSURE QUALITY EXPECTATIONS ARE MET:

- ✦ Verify expectations
- ✦ Follow the process, procedures and quality control steps
- ✦ Report all deviations at an early stage to ensure they can be rectified
- ✦ Follow up on any deviations / Non-conformities and learn from them
